

Webex, for Online Meetings and Video Communication

Webex is an online conferencing and web presentation device that facilitates online collaboration of a project by team members, regardless of where each associate is placed. You can use this web-based project management tool to organize online meetings and show presentations and share documents in real-time. Webex is going to play a great role in future as the online collaboration authority, with the best group scheduling calendar, web presentation technology, instant messaging applications, instant screen sharing/application sharing, whiteboard with annotation capabilities, video communication and more!

Webex is a great online collaborative workspace for virtual teams or even e-learning groups. Customer service, timesheet management, bug tracking, online calendars, and document management are a few important features. These features, along with the vision of Webex make for a company that is the global leader in online collaboration.

Team Webex is a revolution in Online Collaboration! It offers localized web sites in several regions for user convenience. Thus you may pick your region among Canada, UK, Germany, France, Spain, Latin America, China, Japan, Hong Kong, Australia, and India or you may simply continue to the US Webex site.

Webex offers innovative industry solutions for your small, medium or large business, enabling connectivity between people, processes and applications. Before going in for a purchase, you can join the live demo, take a free trial and go through customer case studies before you make up your mind.

Webex management solutions are easy, instant and fairly priced! Use Webex to keep teams coordinated and your projects on track, to accelerate sales cycles and close more deals, to maximize the impact of large online events, to deliver engaging interactive training, and to support remote users as easily as if they were on site. Working on Webex will provide you with continued innovative solutions, outstanding service and support, world-class technology and State-of-the-art security and confidentiality. Get started today!
