

## SocialText : Wiki Simple . Enterprise Strong

[Socialtext.com](http://Socialtext.com) is an enterprise wiki, which is a group -editable website; "composed of web pages you can write on, enabling fast and easy collaboration." www.Socialtext.com claims to provide secure, scalable and easy to use web collaboration services.

The website offers a tool called Socialtext, a global 2000 CIO approved tool, which is to work well as an online collaboration tool to fulfill a range of organizational needs, be it Enterprise, Professional, Personal or Open Source. The website helps to get team members organized in no time, the e-mail overload is greatly reduced and u get a fresh and live intranet with no out of date content.

Socialtext boasts of features such as Integrated IM, email, advanced search, tagging, simple file management, easy installation and navigation. Enterprise features include network and directory integration, personalized and customizable, professional training and support, first-class security and reliability and more. Wiki Collaboration allows users to edit a page and preview it, post comments, create tables and new pages, compare revisions, upload documents and copy and paste from word processing and spreadsheets. Administrators control access to Wiki, with the ability to invite new users, create new wikis, add and remove users etc.

Socialtext is a hosted solution, which means, there is no software to install, no additional applications are required to work on this tool, and the web browser enables you to access Socialtext any time from anywhere. The user interface is easy to use and easily upgradeable.

All communication regarding a project can be carried out on one web page instead of sending emails and attachments. Sharing of space cuts down on email overload and personal pages and web logs can be used to track projects. Read customer testimonials to learn about the success of this online collaboration tool.
